

**Suture**

**Description:**            Monofilament            For smooth passage through tissue.  
                                  Synthetic                    For minimal tissue reaction.  
                                  Non-Absorbable        Provides permanent tensile strength retention in tissue.

**Color:**                    Blue or clear

**Range:**                    10-0 to 2 (USP). Supplied as needled sutures, armed with, for example, X-BLACK\* needles, PRIMIPASS\* needles or CC-needles. Also available with pledgets.

**Indications:**            CARDIOPILENE\* sutures are intended for use in general soft tissue approximation and / or ligation, including use in cardiovascular, ophthalmic and neurosurgical procedures. Typical areas of use include:

- Cardiovascular anastomoses
- Subcuticular sutures

Full details in the Instruction for Use included in every package.
