

## Suture

### Description:

X-wax is a sterile mixture of semisynthetic beeswax, Paraffin and isopropyl palmitate. Bone wax is supplied sterile in 2.5 gram foil envelopes with sealed overwraps. Sterile Bone wax helps local homeostasis by functioning like a mechanical barrier. It is compatible with body tissues, does not induce skin irritation or any allergic reactions. It is opaque and has a waxy odour.

### Action:

X-wax -Sterile Bone wax is a sterile mixture of beeswax, hard paraffin and isopropyl palmitate (a wax-softening agent). It is used to control local bleeding from bone surfaces by creating a mechanical (tamponade) barrier.

### Indications:

Sterile Bone Wax (X-wax) is used to control local bleeding from bone surfaces. It is commonly used in patients undergoing orthopedic surgical procedures.

Full details in the Instruction for Use included in every package.
